writer of these pages invented, patented and successfully demonstrated in the city of Los Angeles, California, a mechanical device by which he transformed musical vibrations into "electrical" waves. These when conveyed to the human organism were found to be harmonizing, vitalizing, and curative, in many nervous and functional disorders. Further study and research along these lines convinced him that all vibration, or motion, or activity is electrical. That all phenomena are electrical phenomena. In fact, that there is but one substance in the universe, and that is-Electricity. Without any attempt to enter the realm of metaphysics, the writer desires to state that he uses the term Life in its absolute or universal sense, and not in the conditioned or limited sense in which it is ordinarily and loosely used. He distinguishes between Life-with its eternal, inherent unceasing impulse and energy-and the resultant of that impulse and energy; whether that resultant be a molecule of hydrogen or what is called consciousness, intelligence, manifesting through an organism called man. This Life is not mind, nor

its product matter. It is Substance-and that substance the writer calls electricity. It is eternal. It is the totality of what is, or Be-ing. It has a dual impulse or tendency, viz. (the positive and negative)-attraction and repulsion of its infinite integral constituent particles or ELECTRONS. This attraction and repulsion, this breaking and closing of the circuit, this vibration or motion-always in a straight line or a circle-this infinite eternal polarity, being continuous creation or evolution, and destruction or devolution.It has not been possible in the limited space devoted to this book to attempt a discussion and proof of the statements made herein. While the statements made are scientific and rational the writer could not do more than point out through them the direction in which the truth is to be sought and found.The reader will find many thoughts suggested along the line of the wireless telegraph and telephone, musical vibrations, thought vibrations, telepathy, clairvoyance, "Spiritualistic phenomena," death, post-mortem consciousness or "Conscious immortality," etc.We are living in an age of

scientific investigation and inquiry. The human mind is awakening to the necessity of doing its own thinking instead of being bound by the many dogmas of religious systems.Laden with ability to annihilate superstition, and forever destroy that curse of humanity-Fear-in all who will carefully and with an open mind read them, these pages are set adrift.

Dark Mirror-Donald Brackett 2008 Singer-songwriters' lyrical reflections have a magical way of expressing our own sentiments and feelings. Almost all of the singer-songwriters discussed here -- including Bob Dylan, John Lennon, Tom Waits, Amy Winehouse, The White Stripes, and many more -- sing in an exotic and raw vocal style, which one would not traditionally call reassuring, and yet their profoundly unique voices appear to be the only ones capable of conveying their unique messages. One of the key elements being studied in this book is the fact that singer-songwriters often suffer from a deep sense of loneliness, perhaps associated with a sense of being the only one who could adequately sing and perform what they compose. Often, even those who write within a famed partnership still compose for that other voice exclusively, much to their chagrin. The irony here is that it is this very tendency towards self-absorption that allows these artists to speak so eloquently for all the rest of us. Utilizing firsthand musical reflections on the nature of the singer-songwriter psychology and its consequences on art and

one delves into the singer-songwriters who function primarily as solo artists; part two explores singer-songwriters who function primarily as part of a team - and who wouldn't write quite the same material for a different partner; and part three surveys those who function as members of a larger thematic community or stylistic tribe, within which they share certain creative sentiments. The Role of Rock-Don Hibbard 1983 Traces the history of the influence of rock music on the lives of its audience and examines the relationship between rock music and society

Gothic Bodies-Steven Bruhm 1994 An intriguing scholarly investigation, not so much of the ways the late eighteenth and early nineteenth centuries articulated pain, but of the ways in which pain itself articulated the late eighteenth-century experience. Through analysis of novels, plays, and poems, the author explores the transition from sensibility as a sense of "selflessness" to Romanticism, which puts the self in the foreground as the mediating consciousness. His tightly focused discussion sets

The Cadillac Story-Thomas E. Bonsall 2004 The Cadillac story is more than the story of a car company. It is, in many ways, the story of the American automobile industry itself—which, as much as any industry, drove America's growth in the twentieth century and defined who we are as a people. For generations of Americans, Cadillac epitomized expansive prosperity. This illustrated history of Cadillac presents all the triumphs and failures of the marque's last sixty years; from the good times, through the disastrous 1980s, and up to the current reconstitution of the brand.

Parking Lot Mood Swing-Doren Robbins 2004 Doren Robbins' essay poem monologues are a riff on contemporary culture, not so much a scream but a sigh, the deepest sigh known. He knows so much it's shocking. But that's not it. In PARKING LOT MOOD SWING he's on the razor's edge, a fully unified sensibility, a vision, a dream. To read his prose is only to know his poetry better and to love him, this wild radical poet on the West Coast. A passionate political protest that is comic, surreal and beautiful, Doren Robbins'

PARKING LOT MOOD SWING powerfully explicates our pitifully whacked out world. Up all night reading these poems to the empty room, I laughed out loud and the blues lifted from me. Give this book to all our dismayed Companeros. Chere Maitre-Peter Eyre 2002 After Sand's spirited defence of Flaubert's novel Salamambo in 1863, the two writers became friends. Both were excited by the attentions of the other, despite their difference in age, and their affection developed into eager and frequent correspondence. So began not a love affair, but a deep friendship and one of the great epistolary masterpieces of modern times.

The Rockin' '60s-Brock Helander 1999 The ultimate shopper's and buyer's guide, this comprehensive resource provides complete personnel of each group, the significant role of each group member, a narrative history of the

group, analysis of key recordings, discography, and archival photos throughout the text. 40 illustrations.

George Meredith-Muhammad Shāhīn 1981 Tarnished Gold-R. Serge Denisoff 1986 The great depression in the popular recording industry that began in 1979 still continues. There are signs, however, that the industry is adjusting to new technologies and may soon revive. R. Serge Denisoff documents the decline and possible revival of this comprehensive study of the recording business, a sequel to his widely acclaimed Solid Gold: The Popular Record Industry. Denisoff offers a brief history of popular music and then, in detail, traces the life cycle of a record, beginning with the artist in the studio and following the record until its purchase. He explains the relationships between artist, manager, producer, company, distributor, merchandiser, and media. They all play roles in the scenario of a hit record. He also discusses the new technologies and how they may affect record sales, especially round-the-clock rock and roll on cable television. Tarnished Gold joins Solid Gold

Preaching Pity-Mary Lenard 1999 "Preaching Pity" situates such well-known Victorian authors as Charles Dickens and Elizabeth Gaskell within an important tradition of nineteenth-century British social reform writing - a tradition in which women writers used feminized, sentimental values like sympathy and spirituality to teach readers how to -read- and respond to social problems. This study contributes substantially to Victorian studies because it both investigates a largely unrecognized, but culturally significant, tradition of now-obscure women writers like Charlotte Elizabeth Tonna and Frances Trollope, and interrogates the gender politics of literary production and reception by looking at how this sentimentalist tradition affected the work and reception of canonical male and female writers." Fleet Walker's Divided Heart-David Zang 1995 Moses Fleetwood Walker was the first black American to play baseball in a major league. But Walker is more than a footnote: his life demonstrates both the devastation of racism and

the role of baseball as a symbol of the nation. Walker achieved college baseball stardom while he was a student at Oberlin College in the 1880s. As Walker's athletic ability earned success on the playing field, racial attitudes were hardening and segregation was becoming the pattern of American society, both on the field and off. Teammates as well as opponents harassed him; Cap Anson, the Chicago White Stockings star, is credited with driving Walker and the few other blacks in the major leagues out of the game but could not have done so alone. Walker's life was defined as much by the fact that he was part white as it was by his black heritage. His attempts to reconcile his Anglo and African aspects left him in glorious disarray. Although acquitted of a murder on the grounds of self-defense, he eventually served time in prison on a federal mail robbery conviction. A gifted athlete, an inventor, a civil rights activist, an author, and an entrepreneur, Walker lived precariously along the fault lines of America's racial dilemma. He died in 1924 after a life of thwarted ambition and talent, frustrated by both the American dream
